## Construction Update

All the contracts and paperwork have been completed to allow construction to begin. Beheler Excavating from Fredericktown has installed the required fencing around the site for the track and softball field and have begun moving in their equipment. They will work on the site over the winter, as weather allows.

Finnegan construction from Ashley, Ohio has been awarded the contract for the greenhouse and will begin construction in the middle of January. They plan on working through the winter and will have all construction completed by Aug 1.

During construction, the parking areas behind the school will be blocked off to allow for storage of materials and movement of construction equipment. This summer the road around the back of the school will be blocked off to allow for installation of the sanitary, drainage, water lines and electrical conduit for the athletic site.

The greenhouse will be completed and ready to be used beginning next school year. The track and softball field should be ready for next spring's season. We look forward to the additional facilities that provide more opportunities for Centerburg students and community.

Mike Hebenthal, Superintendent
